

## Poster Session Award Winners

Recipients of the Poster Session Awards in FMI2012 have been selected according to the voting by all the participants. As we had two poster presentations that got the same highest points, the organizing committee decided to give the Best Poster Award to two poster presentations. Please congratulate each of the following recipients of the poster session awards.

### Best Poster Award

✦ **Jan Březina**

“Asymptotic behavior of solutions to the compressible Navier-Stokes equation around a time-periodic parallel flow”

✦ **Hiroyuki Miura**

“Efficient algorithm for solving underdefined MQ”

### Excellent Poster Award

✦ **Keisuke Goto, Hideo Bannai, Shunsuke Inenaga and Masayuki Takeda**

“Fast q-gram mining on compressed string”

✦ **Taeju Kim, Shuichi Kawano and Yoshiyuki Ninomiya**

“Curve and surface estimation via adaptive basis expansions”

✦ **Yutaro Kiyomura**

“Composite order Tate pairing using Window Miller’s algorithm and NAF”

✦ **Shoko Sugimoto and Yasuhide Fukumoto**

“Rainfall-runoff analysis in a river”

✦ **Masashi Yasumoto**

“Weierstrass representation for semi-discrete minimal surfaces, and comparison of three discretized catenoids”

The organizing committee would like to thank everyone who presented, judged, and attended the FMI2012 Poster Session. The event had 29 posters and was very well attended. Thanks again to all who participated and congratulations to the Poster Session Award winners.
