

Poster Session Award Winners

Recipients of the Poster Session Award in FMI2013 have been selected according to the voting by all the participants. The organizing committee chose two additional posters for a special award. Please congratulate each of the following recipients of the poster session.

Best Poster Award

- ✚ **Eriko Shinkawa**
“Double Crystals Problem”

Excellent Poster Award

- ✚ **Hiroto Inoue**
“Expansion of Completed Riemann Zeta Function in Meixner-Pollaczek Polynomials and its Zeros”
- ✚ **Kohei Matsushita, Hiroyasu Hamada and Genki Matsuda**
“A Fast Computation of Matrix Exponential and its Application in CG”
- ✚ **Hiroyuki Suwa**
“Zero Mean Curvature Surfaces of Riemann Type in the Lorentz-Minkowski 3-space that Change Their Causal Type”
- ✚ **Daisuke Uchi, Ryuei Nishii and Pan Qin**
“Bayesian Models for Contextual Unmixing of Hyperspectral Data”
- ✚ **Rong Zou and Yasuhide Fukumoto**
“Spectra and Energy in Magnetohydrodynamic Waves”

[HOPE Award]

- ✚ **Yun-Ju Huang**
“Improvement of Faugère et al.’s Method to Solve ECDLP”
- ✚ **Busayamas Pimpunchat**
“Time Series for Principle Parameters Forecasting related to Particulate Matter of Haze Problem in Upper Northern of Thailand”

The organizing committee would like to thank everyone who presented, judged, and attended the FMI2013 Poster Session. The event had 27 posters and was very well attended. Thanks again to all who participated and congratulations to the Poster Session Award winners.
